DETAILED ACTION***Allowable Subject Matter***

Claims 4-6 are allowed. The following is an examiner's statement of reasons for allowance: The claims are allowable over the prior art of record because the teachings of the references taken as a whole do not teach or render obvious the combination set forth, including that of the bristles of a brush seal are tilted from the attachment portion and a support surface or back plate including a resistance means for preventing the bristles from moving in such a direction as to reduce their tilt angle, an annular projection extending from an inner peripheral end of a support surface, or an annular projection being disposed in a center of a support surface.

U.S. Patent Number 5,799,952 to Morrison et al. discloses a brush seal with a brush seal, a back plate including a support surface for support a side of the brush seal, and a retaining plate for retaining the brush seal. However, Morrison does not disclose the brush seal having means of resistance for preventing the bristles from moving that reduces the bristles tilt angle, or an annular projection which extends from either an inner peripheral end or the center of the support surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
